

April 5, 2008 (PRESS RELEASE)—For immediate release

## **Digicomm International announces Opening of New Corporate Headquarters & Distribution Warehouse in the Denver area.**

Englewood, CO (April 5, 2008) Digicomm International, Inc., a leading international supplier of equipment for the Cable Television industry announced the opening of the company's new headquarters in Englewood, CO. The 250,000 square foot facility, located at 1 Digicomm Drive is the largest pure distribution facility in the CATV industry. The two year development and construction project completed in February.

This warehouse currently stores over 23,000 pallets, coaxial cable, fiber and well over 25,000 part numbers of CATV equipment. The warehouse design contains 32-foot clear height ceilings for maximum storage & efficiency.

This will allow the cable television equipment supplier to consolidate its operations under one roof.

“Consolidating our inventory and staff will generate tremendous operating efficiencies for Digicomm and the cable operators we support,” said Rob Donziger, President. “The expanded headquarters and office space will also enable us to increase staff and support our growth in the coming years. This new facility represents a dramatic improvement from our previous location and will allow us to support the rapidly growing demand for our products. This facility will serve as a showcase location for Digicomm as well as the manufacturers we represent.”

### **About Digicomm International, Inc.**

Founded in 1993, Digicomm International is an Englewood, CO based distributor of equipment for the CATV industry. Digicomm stocks an extensive inventory of products the cable industry requires to support its operations and network infrastructure. Digicomm is a stocking distributor for respected manufacturers such as Scientific Atlanta, 3M and many others. Digicomm also manufactures products such as pads & equalizers, HDMI cables, etc... at offsite locations.
